

Professor Nobella Boomrocket

Works at the Imperial College London where she teaches Physics. She won the Hugh's Medal for her work in magnetism in 2017.

Physics is the natural science that studies matter, its motion and behaviour through space and time, and how it relates to energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is to understand how the universe behaves.

- Weather and seasons
- Light
- Forces
- Magnets
- Sound
- Electricity
- Earth and Space

You can contact Professor Nobelle Boomrocket on her email if you have any questions about Physics and she will try and help you.
